## WHY ONECOIN – HOW DO WE CREATE VALUE FOR OUR MEMBERS?

OneCoin Value

**SCARCE** → Central Banks can't inflate them

**DURABLE** → they don't degrade

**PORTABLE** → can be carried and transmitted electronically

**VERIFIABLE** → through the block chain

**EASY TO STORE** → electronic, on a laptop or mobile device

## THE TIME IS NOW

1

### Get in Early

2

### Split

Your OneTokens will split up to 2 times - giving you more tokens to sell!

3

### Get Rewarded

Remember, **you get points for all the people who join after your join date**. The earlier you join, the more points you get!

## THE ONEACADEMY

Our educational OneAcademy packages will give you all the **trading skills that you need**, through interactive materials like videos, presentations and online quizzes, all designed to make you profit from owning cryptocurrency. We give you the opportunity to become the next cryptocurrency millionaire.

Even **if you have no prior skills about trading** and no prior knowhow of trading with cryptocurrency, you will be guided through our **5 level** step by step plan to success. Our educational packages provide not only knowledge but also a way to put your new skills to the test, in our very own exchange, the **OneExchange**. Trade our OneTokens with other members, make real money and experience the excitement of success.

All educational packages contain FREE OneTokens. The tokens can be traded on the OneExchange, where tens of thousands of other members profit from buying and selling tokens, just like most of the exchanges trading other cryptocurrency.

## AND LET THE TRAINING BEGIN...

With your product package you purchase a training course from the **OneAcademy**.

To give you a chance to **get to know the market and to profit**, we created the **OneTokens** and the **OneExchange**. You can trade the tokens for profit, buy and sell and prepare for the launch of OneCoin.

To make the process **more profitable for you**, we introduced the splits! **When the price of OneTokens rises, we do SPLITS** – and double the amount of your tokens in your portfolio – to avoid a too early price explosion for our Tokens and Coins.

After you got some training with the OneTokens, we will launch the OneCoin. In a WebEvent, where all our members can participate – **we will jointly mine the first OneCoins – the so called Genesis Block**. Everybody can watch how the Blockchain starts and coins are created.

And after that – everybody can join the mining and create his own coins and profit from the value increase.

## JOINING THE MINER

Every member can join the miner! Depending on the number of coins mined and difficulty, the costs of mining differ.

In the beginning the costs to find OneCoins will be very low, but will grow as more and more members join and more coins are found.

Your OneTokens secure for you a place in the mining pools. The company ensures the mining resources – and all members who wish can participate in one of the mining pools.

Depending on your package, how many slots you would like to secure for yourself – and on the difficulty of mining, you can join anytime our Mining Engine – and watch in realtime how your coins will be mined.

## THE ONEEXCHANGE

The Place where all the action happens. You can buy and sell tokens, or just observe what others are doing...

- ✓ Track the price of the tokens – who is selling, who is buying?
- ✓ What about the Aurum Gold Coins?
- ✓ When will the next split come?

## SPLITS

As more and more members join, and the demand for tokens gets higher and higher it is only natural that the price of the tokens increases. With every new member joining ONE, the demand grows and the **price of our OneTokens on the exchange grows.**

Of course we want OneCoin to be successful – but a price explosion too early is not always good. **This is why we created the opportunity for you to split and double your money!** New members can join at attractive low prices – but we do not want you to have a disadvantage. This is why once a number of new members is reached – we **SPLIT** your tokens. This means we double the amount on your account!

And as more and more new members join – the price again rises – again a split happens. Congratulations, you **AGAIN** doubled your money. Depending on the package you have you split up to 2 times – you can do 2 split and achieve the **value of your product package!!! So accumulate and save these tokens... or buy more.**

## HOW DO I KNOW ONECOIN IS REAL? THERE ARE OTHER COINS ON THE MARKET...

OneCoin is based on a solid and innovative **cryptographic** concept. **Like the successful and big currencies, OneCoin is mined by its users.** Many other coins are premined – and the owners take the profit. At ONE the users jointly create the coins, by building **mining pools**, joining resources and making OneCoin grow.

OneCoin integrated all success factors of the big successful currencies – but also introduces innovations – using new standards of security.

Every user gets an **E-Wallet, with an own unique address, which is encrypted** – and where his coins are stored. Every user will receive his cryptocurrencies in this wallet.

We will **publish the blockchains** on our mining website - the OneCoin website. Every user can see in realtime how the coins are mined – and all transactions verified. No transaction, no coin can be mined outside the blockchain. And all members will be able to see and participate.

OneCoin will be traded on its **own exchange**, for OneTokens, and later for other currencies like EURO and USD.

## ONECOIN GROWTH POTENTIAL

✓ What needs to happen in order for OneCoin to achieve this growth?

- High number of traders - the more members, the higher the tradability (the so-called "liquidity") of OneCoin, which boosts its value;
- Active mining from members – the more mining occurs, the more the price of OneCoin will go up;
- Popularity - the more OneCoin is popularized by its members as a viable alternative to Bitcoin, the more its value will increase;
- Education of members - the better members are educated about trading cryptocurrency, the more precise the trading process, hence the value of OneCoin will go up.

I want to show people the increased Matching Bonus potential if they a) expand their organization and b) go for a bigger product package. ## THE FUTURE

- ✓ OneCoin has an ambitious goal – becoming the new Bitcoin!
- ✓ Once 90% of the OneCoins are mined, we plan to go public and list OneCoin on public exchanges!
- ✓ Then, OneCoin can be widely used in online transactions and e-wallet payments, which will help it gain even more popularity!

I want to show people the increased Matching Bonus potential if they a) expand their organization and b) go for a bigger product package. It may need two or more slides to show it clearly but here is an example of what you might earn with various packages if you get 2 who get 2, 3 who get 3, and 5 who get 5, assuming an average network bonus earning of just 100 euro per week of everyone in the team.
